

RESTORING PROPERTY.....

RESTORING LIVES!

Big Sky Disaster Restoration has been a pinnacle in the Greater Billings Area for nearly 40 years. We are the most experienced contractor in our area. We have successfully completed millions of dollars worth of fire and water restoration work over the years. Big Sky will take responsibility to manage your project as your General Contractor. Our goal is to provide you with the BEST customer service possible. Steve Longshore worked for Big Sky for 15 years, 5 years as the Head Supervisor. In August of 2016, Steve went into a partnership with Philip Witschi, to purchase the company. Philip has over 30 years of General Contractor experience, as well as being a licensed electrician. Philip is the construction head supervisor and is very good at keeping jobs moving smoothly and well paced. Steve has a solid knowledge of every aspect of the restoration process from accessing your job, sketching the estimates, working with your insurance and mortgage company, and making sure your job is on schedule and handled respectfully! You are in good hands with Steve and Philip in the lead! Big Sky Disaster is dedicated to restoring homes and restoring lives. We aim to make the worst tragedy of your life a little easier to handle! Let us take care of the hard work while you take care of you!

A review from Shanteal....."In May of 2015...we had a garage fire that caused severe damage to our entire home but also caused injuries to my husband our youngest son. We were immediately flown to the Salt Lake City Burn Center for medical attention where we remained for 4 weeks. Steve and his amazing staff showed up and started work on our home immediately. They were patient with us through the whole process. They not only completed our home to perfection they helped pick up the pieces of our shattered lives. They were strangers who became friends. They genuinely care and do amazing work. We will forever be grateful!!!!"

FIRE!

No matter how small or large the fire, containment is our first priority. Big Sky Disaster is available 24/7 to board up your property immediately once it is safe. This will preserve, protect, and secure your property and possessions (as required by your insurance policy) from hazards, weather, vandals, and increased damage due to prolonged exposure to water or acid-soot residues. Our fire restoration technicians have been trained in first response containment and will help you retrieve those valuables that are most important to you and protect them immediately from further damage. Before proceeding further, a comprehensive damage assessment is completed, and coordination (including costs and estimates) is made with your insurance adjuster to confirm coverage and payment. There is never any surprise about "who pays"! Big Sky Disaster will be your General Contractor, scheduling and billing all subcontractors, and keeping your restoration going at a steady pace. We will also serve as a liaison between you and your insurance company if questions arise. We want to make this process as painless as possible; you have already been through enough!

SMOKE!

Did you burn a roast? Recently quit smoking and want to rid your home of the smoke smell? Was there a grass fire nearby that permeated your home? Did you buy a vehicle or property previously belonging to a smoker? We can help!

Big Sky Disaster Restoration has no less than five different systems (including electronic equipment which produces nature's most perfect deodorant, ozone gas) for **permanent** odor elimination! Given time and the proper working conditions, one of our modern systems will eliminate even the most persistent smoke odor! Many items that seem un-restorable, can be cleaned if given the correct care and treatment. Big Sky Disaster will come clean your walls, ceilings, ductwork, furniture and belongings using odor eliminating solutions and procedures. We will restore your property in a reasonable amount of time, with little discomfort to you! Again, we will help you work with your insurance adjuster to make as little disruption for you as possible!

WATER!

When talking water, rapid response is the key! Whether from rising water, a broken appliance, or a simple broken pipe, our professional procedures eliminate the inconvenience quickly, accurately, and economically- with **24-hour emergency service!**

Once the water source has been eliminated, our water restoration technicians employ industrial extraction equipment to remove the excess and contain the damage to the minimum area as possible. Protection is provided to keep furniture from being damaged by water, while preventing carpet staining. Using special inspection tools, (including Infra-Red cameras) the technicians will determine the extent of damage, evaluate the components (carpet, pad, wood flooring, laminate) to determine drying probability. From there a course of action will be made in restoring or replacing the damaged floors. The area will be treated with an EPS-registered disinfectant to arrest and control odors and mildew, along with potential health issues during drying. Special drying and dehumidification equipment insures maximum drying with minimum inconvenience to you, your family, or staff.

Call Big Sky Disaster Restoration next time you encounter a fire, water, or smoke damage situation in your home or business! With Big Sky on the job, you can rest assured that you are in good hands!
